

Product activation for licensed versions

The easiest way to activate your software is to run the Design Wizard with a worksheet having the word "Activation" in cell A1:

	A1	
	A	
1	Activation	

[Run the Wizard](#). You will see a dialog box containing fields labeled **MID**, **Site code** and **Activation code**. The **MID** and **Site code** fields appear with a red background, and the **Application status** field shows LOCKED.

Experimental Design Wizard

Site code: BCFC95FF

MID: 053D-D7EC-B01D-C1BE

Activation code: [Empty]

Unlock application

Enter application

LOCKED

Cancel Continue >>

Copy the MID and Site code into an email message, then send it along with your contact information to gboomer1@san.rr.com. Please copy just the codes. Do not send a screen shot of the window. StatWizards LLC will use this information to calculate an *Activation code*, which we will then return to you. Paste the code into the field labeled Activation code on the form, then press the continue button to unlock the Simulator Wizard.

This screen will reappear for each new Excel session, but will do so with the **Application status** showing UNLOCKED. Simply click the **Continue >>** button to proceed.

Bear in mind that if you have purchased other StatWizard modules (e.g., the Discrete Choice Suite) you must submit separate Site Codes and MID's for each product. In doing so, please list the product to which each Site Code and MID belongs.
